INSIDE THE COCKPIT (VERBS)

KEY WORDS	EXTRA VOCABULARY	EXAMPLE SENTENCES & PHRASES
		I suggest getting inside the cockpit of an aircraft.
to scan – просматривать	to skim – бегло просматривать	to scan the front panel
to check – проверять	to verify, to make sure – убедиться, проверить	to check the engine oil quantities
to complete – завершать, выполнять	to run – запускать, проводить	to complete a test to run a system check
to set – устанавливать	to adjust – настроить, отрегулировать	to run a system check
		This is a flightdeck of an airplane. So far there is nobody here. But let's assume that pilots will come here in a minute and will start the preflight procedure.
a switch	to switch sth on/off	to turn the switch on Could you please switch the taxi lights on.
a knob	to rotate – вращать	The pilot rotates the knob to set the correct pressure.
a button	to push on/off – нажать для включения или выключения	to press and hold the light test button
a switch guard	to guard – зафиксировать защитным колпачком	Make sure that the switch is armed and guarded.
a light a sign	to illuminate – гореть to flash – мигать to dim – тускнеть или снижать яркость to extinguish – гаснуть	Pilots must verify that the low pressure lights extinguish. Since the low voltage sign was flashing, we had to run the system check again.
overhead panel central pedestal aisle stand	a lever – рычаг throttle quadrant – сектор газа	The engine start levers are set to CUT OFF position. Before takeoff the pilot sets the flaps lever to 5 degrees and sets the thrust lever to TO position.
Flight management computer (FMC)	entry – ввод to enter – вводить	to enter data into computer to complete the computer entries In order to complete the preflight preparation, the pilot must enter route and performance data into the Flight Management Computer, as well as set cabin pressurization and lights.
a yoke a sidestick a centerstick	rudder pedals – педали руля направления flight controls – органы управления	During the flight controls check, the pilot moves all controls slowly through their full range. It is done so to make sure that there are no jams or restrictions and the response of the control surfaces is correct.
a tiller	to steer – управлять	The tiller, which is installed on the captain's side of the aircraft, is used for nose wheel steering.
analogue gauge		The cockpit is equipped with up-to-date multifunctional displays while there are almost no traditional analogue gauges
