AIRPORT OVERVIEW

KEY NOUNS	EXTRA VOCABULARY	EXAMPLE SENTENCES
	aerial - воздушный	It is an aerial view of a major airport.
	several - несколько to surround - окружать	We see an airfield with several runways and a passenger terminal here, the airfield itself is partially surrounded by the sea.
layout	airfield layout - схема или конфигурация аэродрома aircraft (seat) layout – компоновка воздушного судна, схема расположения кресел в салоне самолета CBT course layout – содержание курса CBT	The airport has a quite complex layout, there are four runways which are configured perpendicularly in pairs.
single runway	close parallel runways intermediate parallel runways far parallel runways dual-line runways open-V runways intersecting runways	There are several types of parallel runways. Open-V runways with dependent operations toward (away from) intersection. Runways intersecting at their mid-points and those intersecting at near (far) threshold.
separation	sufficient – достаточный simultaneously – одновременно (нареч.) to receive – принимать	It looks like the separation between these parallel runways is sufficient enough for them to be used simultaneously. The runway length and width makes it possible for the airport to receive all types of aircraft.
terminal design	linear - прямолинейный semicircular - полукруглый pier – с пирсами satellite – рядом расположенный («спутник») midfield (remote) concourses – удаленные	An airport has a hybrid layout. The airport terminal has a pier-semicircular layout with satellite concourses at the end of some piers.
capacity	fuel tank capacity – объем топливного бака battery capacity - емкость аккумуляторной батареи	Airports of this type can provide parking space for a big number of airplanes at the same time. Airports of this type offer high aircraft capacity.
	to link - связывать	Multiple taxiways link the runways with the apron
high-speed exit rapid exit runway	acute – острый (угол, проблема) rapidly – быстро (нареч.)	The high-speed exits are the ones that are connected to the runway at an acute angle. They allow arriving airplanes to vacate the runway faster (more rapidly) and reach the gate area more efficiently.
pre-threshold zone take-off roll	to tend – стремиться, иметь склонность	The pilots tend to start take-off roll in the pre-threshold zone in order to use the runway with maximum efficiency.
active runway runway-in-use		Since there are airplanes on all runways we may suppose that all four of them are active right now
to line up	ATC clearance – разрешение диспетчера holding position – место ожидания (остановки)	There are airplanes on both 1R and 1L which have lined up and are ready for take-off. A group of other airplanes is staying in line for an ATC clearance. A Canadian Boeing is holding short of the runway intersection.
	proximity – близость to be exposed – подвергаться demanding - требовательный	From the pilot perspective, it seems to be a demanding destination airport.
