

What factors have to be taken into consideration when calculating the amount of fuel needed? How do you calculate the fuel required for the flight?

What would make a parallel approach difficult? Paraphrase: Why could a parallel approach be difficult?

Why is an imminent belly landing declared as an emergency? Paraphrase: Why is belly landing considered to be an emergency?

What seasons are considered to be risky because of the water fowl bird migration? Paraphrase: What seasons are dangerous due to bird migration?

Imagine you see a suspect with a heavy bag on the ramp. What would you do? Paraphrase: A person near the aircraft has a heavy bag and looks like a terrorist. What would your actions be?

Why shall a pilot be by all means trained for carrying dangerous goods? Paraphrase: Why is training on transporting dangerous cargo necessary for pilots?

As soon as the smoke alarm in the flight deck has triggered, what do you do? Paraphrase: If you hear the smoke alarm in the cockpit, what are your actions?

What circumstances might require a request for progressive taxi instructions? Paraphrase: What are possible situations when you need to ask for progressive taxi instructions?

Why are relief flight crews definitely essential? Paraphrase: Why are extra flight crews necessary on board?

Believed by many experts, it is hardly possible to conduct a missed approach procedure with one engine shut down? What do you think? Paraphrase: How difficult is it to go around with a single engine failure?

Have you ever encountered any difficulties related to volcanic activity? Can you share? Paraphrase: Please tell me about your flying experience in the area of volcanic activity?

What would you do if after a missed approach the weather suddenly deteriorated? Paraphrase: What are your actions in case of adverse weather after go-around?

What do you think has probably happened if some changes have been done to your flight plan? Paraphrase: What may cause changes to your flight plan?

If there was an unruly passenger on board, how could pilots remedy the situation? Paraphrase: Imagine there is an aggressive passenger on board. Flight attendants ask for your help? What would you do?

Being Pilot Monitoring, what shall you concentrate upon during the final approach? Paraphrase: What are your main duties during the final approach if you are a Pilot Monitoring?

Why have some pilots still been aborting the take-off after V1? Paraphrase: Why do some pilots abort the take-off after reaching V1?

How can airport personnel contribute to aviation security? Paraphrase: What can airport services do to prevent any security problems?

Should the yaw damper fail, what would you do? Paraphrase: If the yaw damper fails, what will you do?

What would you do if the controller repeated the message several times but you failed to understand him? Paraphrase: Imagine the controller repeats the message many times. But you don't understand him at all. What can you do?

What equipment would help operate aircraft if you were landing in poor visibility conditions? Paraphrase: What equipment will help you land in low visibility conditions?

What ground services would be required if some passengers played the wild during your flight? Paraphrase: What ground services will you request in case of unruly passengers on board?

Why is it obligatory to follow a noise abatement procedure when overflying some areas? Paraphrase: Why is a noise abatement procedure introduced at some airports?

How much experience shall a pilot have to achieve the rank of a Captain? Paraphrase: What working experience should a pilot have to become a Captain?

What does a flight crew require to study before landing at an unfamiliar airport? Paraphrase: What does a crew need in case of landing at an unknown airport?

What has to be done in the event of observing Saint Elmo's lights? Paraphrase: What will you do if there is static electricity on the windscreen?

What shall pilots be extremely concentrated on while operating in airspace with mixed traffic? Paraphrase: What should a pilot consider while operating in airspace with mixed traffic?

Military flights in the vicinity of the airport are said to be hardly possible. How often do you think it happens? Paraphrase: How often do military actions near the airport happen today?

How would you describe the difference between ditching and belly landing? Paraphrase: What is ditching and belly landing?

What would you do if suddenly a strayed animal appeared on the airfield on take-off? Paraphrase: What are your actions in case there is a stray animal on the runway?

Having received information on bomb scare on board, what does a pilot report to ATC? Paraphrase: What do you report to a controller if there is a bomb scare on board?

To your mind, why have the restrictions in carrying liquids on board been implemented? Paraphrase: Why is the amount of liquid in hand baggage limited?

What upgrades have been attempted by the Boeing manufacturers to make the aircraft interior more fire-resistant? Paraphrase: What modifications have been done by Boeing designers to make the aircraft interior safer?

What events are likely to happen in case animals penetrate a restricted airfield area? Paraphrase: What situations are possible if some animals enter any prohibited airport area?

The doctors say that flying is too detrimental. What supports their opinion? Paraphrase: The doctors say that flying is bad for passengers. What are the reasons?

Why is identification of a wind shear of vital importance for the crew and the passengers? Paraphrase: Why is it hazardous not to identify a wind shear in time?

Could you specify the difference between a microburst and a windshear? Paraphrase: What is the difference between a microburst and a windshear?

If a missed approach is imminent, would you prefer to make it manually or automatically? Why? Paraphrase: How will you perform a missed approach: manually or automatically? Why?

What would you do if your flight plan timed out? Paraphrase: Your flight plan is old. What will you do?

What features of people's appearance are clearly mistrustful? Paraphrase: What details of people's appearance are suspicious?

What are the effects of medical-related incidents on a flight? Paraphrase: If there is a medical problem on board, how can it change the route?

What is required for a pilot to do in case of a burst tire on take-off? Paraphrase: What shall a pilot do if there is a burst tire during taking off?

Aviation personnel strikes have become amazingly traditional nowadays. What do you think of it? Paraphrase: Why are strikes of aviation personnel so frequent today?

What specific engine operation features shall a pilot be normally aware of flying in hot climate? Paraphrase: What characteristics of engine operation shall a pilot know if he flies in hot climate?

What were the situations in your practice when you had encountered difficulties with understanding ATC due to a local accent? Paraphrase: When did you have problems with understanding local accents in flight?

What is the difference between tarmac and plot? Paraphrase: What is the difference between the apron and the cargo ramp?

What ground equipment facilitates boarding of passengers? Paraphrase: What devices help the passengers get on board?

What pilot actions are required as soon as food poisoning is suspected on board? Paraphrase: If there is food poisoning on board, what has to be done?

What are advantages and disadvantages of being a pilot? Paraphrase: What are positive and negative aspects of being a pilot?

There is an opinion that pilots have only financial motives for their job. To what extent do you agree or disagree? Paraphrase: How important is salary in the job of a pilot?

What does a pilot do if he is not sure of a waypoint name he is to proceed to? Paraphrase: What does the pilot do in case he misses the correct name of the next waypoint?

What measures can be taken to sufficiently decrease the amount of mid-air collisions? Paraphrase: What can be done to reduce the number of mid-air collisions?

What will you have to do being forced to land at an unfamiliar alternate aerodrome? Paraphrase: What will you do in case of an emergency landing at an unknown aerodrome?

Should a need for emergency evacuation arise, what equipment would be used? Paraphrase: What equipment could be used for emergency evacuation if necessary?

How can insects possibly impact flight safety, if at all? Paraphrase: How can insects affect flight safety?

Being advised on bomb threat on board, how would you react? Paraphrase: How will you react to information about a bomb on board?

Why would airport security services heavily rely on sniffer dogs? Paraphrase: Why are service dogs used by airport security services?

If the situation on board due to fumes is changing for the worse, how will you manage the problem? Paraphrase: If because of fumes the situation on board is getting more serious than you have expected, what will you do?

What events in pilots practice can make him get back to the apron? Paraphrase: What situations may force a pilot to return to the stand?

How do you usually cope with stress if any? Paraphrase: What do you do to avoid stress?

What events would trigger the majority of landing incidents? Paraphrase: What may cause landing incidents?

Why shall crosswind component limitations be taken into consideration? Paraphrase: Why is it necessary to know crosswind component?

What factors do you think may force a pilot to initiate a missed approach procedure? Paraphrase: Why does a pilot sometimes have to perform a missed approach procedure?

What weather information shall a pilot be aware of before the flight? Paraphrase: What information about weather conditions shall a pilot know before the flight?

What would you do if a purser informed you about a passenger who kept on smoking in the lavatory? Paraphrase: A passenger continues smoking in the toilet after pursers request to stop it. A senior flight attendant asks you for help? What will you do?

What in-flight weather-related situations may be demanding for a pilot? Paraphrase: What weather conditions may make the flight difficult?

Should a pilot incapacitation occur shortly after take-off, what would you do? Paraphrase: What would you do in case another pilot is unable to work after take-off?

What can hinder the normal flow of flight? Paraphrase: What are possible reasons for any non-routine situations in flight?

What do you think a pilot should do when he finds out he has lost communication? Paraphrase: What is recommended for a pilot to do if he has a contact with an ATC?

How is (speaking internationally intelligible) within the aeronautical environment provided? Paraphrase: What do pilots do to speak English according to the international standards? (What proficiency is required?).

What type of approach would you choose in low visibility conditions? Paraphrase: What type of approach would you use in low visibility conditions?

What shall be done by a pilot if any doubts about a taxi route exist? Paraphrase: What are pilots mandatory actions if they are not sure of a taxi route?

What in-flight solutions depend on the pilots monitoring suggestions according to CRM? Paraphrase: In which non-standard situations does Pilot Monitoring help Pilot Flying?

Could you share your memories about the most unforgettable flight in your practice? Paraphrase: If you can, tell me about the most interesting flight in your practice, please.

What would you do if there was a sudden cabin depressurization? Paraphrase: Imagine there is a quick loss of cabin pressure? What will you do in this case?

Why would a retransmission station be used on a VHF frequency? Paraphrase: What is the purpose of a radio really station for VHF frequencies?

What lateral separation is considered to be really jeopardizing for flight? Paraphrase: What distance between the aircraft is really hazardous for flight?

Why are hold short points displaced for CAT 3 operation? Paraphrase: Why does ILS sensitive area have to be clear in CAT 3 operation?

Should a belly landing be required, how will the flight crew prepare for it? Paraphrase: How should a pilot be prepared for belly landing if needed?

How reasonable is the idea of traveling with pets in the passenger cabin? Paraphrase: What is your opinion about carrying pets in the cabin?

What clues may give you a hint of a real bomb scare on board? Paraphrase: What are the signs of a real bomb threat on board?

What conditions are required for carrying perishable organs for transplantation? Paraphrase: What is necessary to carry human organs for transplantation by air?

What services and facilities may be helpful in case an aircraft has caught fire shortly after take-off? Paraphrase: What services can immediately help the crew if the aircraft is on fire during take-off?

What sources can help pilots retrieve airport related information? (Airport Directory) Paraphrase: How can pilots get information about airport operations?

What will you do if you see a crew member in low spirits and in a bad physical condition? Paraphrase: If one of the crew members is upset or ill, what will you do?

Pilots say it must be next to impossible to land safely if you fly in the area of volcanic activity. What do you think of it? Paraphrase: What is your opinion about landing in the area of volcanic activity?

Why are dust storms thought to affect flight operations? Paraphrase: What is your opinion about the danger of dust storms?

A severe windshear doesn't seem to be easy to recover from, does it? Paraphrase: If there is a severe windshear, how difficult is it to stabilize the aircraft?

Why are briefings required to be held? Paraphrase: Why is it important to have a briefing before each flight?

What passengers-related problems are mostly typical for charter flights? Paraphrase: What problems frequently happen with passengers during charter flights?

What natural phenomena are to be avoided in any case? Paraphrase: What natural phenomena do you think you shall always avoid?

What consequences may an earthquake lead to on take-off or landing? Paraphrase: What may happen in an earthquake area during take-off or landing?

What cases will definitely refuse aircraft to enter the airspace? Paraphrase: Why may some airspace be forbidden for entry?

What would you do if the main electrical generator became inoperative? Paraphrase: Imagine the main electrical generator does not operate. What will you do?

Which accents are sufficiently intelligible to provide effective radiotelephony communications?
